

(一) 期刊論文

(1) Hsiang-Shun Chou , Keh-Ning Huang, and W. R. Johnson,

Magnetic Dipole Transitions of Pb-Like Ions from the

Multiconfiguration Relativistic Random-Phase

Approximation

Phys. Rev. A44, R2769 (1991).

(2) Hsiang-Shun Chou and K-N Huang,

Relativistic Excitation Energies and Oscillator Strengths for

the $(6s^2)^1S_0 \rightarrow (6s6p)^3P_1, ^1P_1$ Transitions in Hg-Like Ions

Phys. Rev. A45, 1403 (1992).

(3) Hsiang-Shun Chou and K-N Huang,

Relativistic Excitation Energies and Oscillator Strengths for

the $(5s^2)^1S_0 \rightarrow (5s5p)^3P_1, ^1P_1$ Transitions in Cd-Like Ions

Phys. Rev. A46, 3725 (1992).

(4) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,

Core-Polarization Effects for the Intercombination and

Resonance Transitions in Cd-Like Ions.

Phys. Rev. A48, 2453 (1993).

(5) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,

Core-Polarization Effects for the $(6s^2)^1S_0 \rightarrow (6s6p)^3P_1, ^1P_1$

Transitions in Hg-Like Ions

J. Phys. B**26**, 2303 (1993).

- (6) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,
Relativistic Excitation Energies and Oscillator Strengths
including Core-Polarization Effects for the
Intercombination and Resonance Transitions in Mg-Like
Ions

J. Phys. B**26**, 4079 (1993).

- (7) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,
Core-Polarization Effects in the $^3P_1 - ^1P_1$ Separations of
Cd-Like and Hg-Like Ions

Phys. Lett. A**182**, 302 (1993).

- (8) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,
Relativistic Excitation Energies and Oscillator Strengths for
Transitions in Zn-Like Ions including Core-Polarization
Effects

Phys. Rev. A**49**, 2394 (1994).

- (9) Hsiang-Shun Chou , Hsin-Chang Chi, and K-N Huang,

Core-Polarization Effects on the Intercombination and
Resonance Transitions in Be-Like Ions

Chin. J. Phys. **32**, 261 (1994).

(10) Hsiang-Shun Chou and K-N Huang,

Implications of Parity and Time-Reversal Symmetries in
Atoms

Chin. J. Phys. **32**, 171 (1994).

(11) K-N Huang, Hsin-Chang Chi, and Hsiang-Shun Chou

The MCRRPA Theory and its Applications to
Photoexcitation and Photoionization

Chin. J. Phys. **33**, 565 (1995).

(12) Hsiang-Shun Chou , Jieh-Yi Chang, Yun-Hsiung Chang,
and K-N Huang,

Energy-Level Scheme and Transition Probabilities of
S-Like Ions

At. Data Nucl. Data Tables **62**, 77 (1996).

(13) Hsiang-Shun Chou and K-N Huang,

Core-Shielding Effects on Photoexcitation of the Hg-Like
Ions

Chin. J. Phys. **35**, 35 (1997).

(14) Hsiang-Shun Chou and W. R. Johnson,

Relativistic Calculations of Transition Rates for
Copper-Like, Silver-Like, and Gold-Like Ions,

Phys. Rev. A**56**, 2424 (1997).

(15) Hsiang-Shun Chou

Relativistic Many-Body Calculations of Transition
Amplitudes for Berylliumlike Ions

Phys. Rev. A**62**, 042507 (2000)

(16) Hsiang-Shun Chou

Fine-Structure Splittings in S-like Ions

Chin. J. Phys. **38**, 914 (2000)

(17) Hsiang-Shun Chou

Calculations for Transition Rates of Beryllium-Like Ions

Chin. J. Phys. **39**, 41(2001).

(18) Hsiang-Shun Chou

On the Overall Permutation Symmetry for the Nonlinear
Susceptibility

Chin. J. Phys. **39**, 172 (2001).

(19) Hsiang-Shun Chou

Laser-Induced Transparency as a Consequence of
Time-Reversal Symmetry
Nucl. Phys. A **684**, 716c (2001).

(20) Hsiang-Shun Chou

Comments on “Relativistic Many-Body Calculations of
Transition Probabilities for the $2l_1 2l_2 [LSJ] - 2l_3 2l_4 [L' S'$
 $J']$ Lines in the Be-like Ions”
Physica Scripta **64**, 140 (2001)..

(21) Hsiang-Shun Chou

On the Time-Reversal Invariance of the Fundamental
Commutation Relation
Chin. J. Phys. **42**, 243 (2004).

(22) P. Bogdanovich and H.-S. Chou

Comparison of Two Theoretical Methods for studying
2-2 Transitions in Beryllium Isoelectronic Sequence
Lithuanian J. Phys. **47**, 387 (2007)

(23) Hsiang-Shun Chou and Jörg Evers,

Dressed-Atom Multiphoton Analysis of Anomalous

Electromagnetically Induced Absorption

Phys. Rev. Lett. 104, 213602 (2010)

(24) Hsin-Chang Chi and Hsiang-Shun Chou,

Theoretical Oscillator Strengths for the Spin-Allowed

Electric-Dipole Transitions in Zn-like Ions

Phys. Rev. A82, 032518 (2010)

(25) Hsin-Chang Chi and Hsiang-Shun Chou,

Oscillator Strengths and Lifetimes of Zn I and Ga II

J. Phys. B47, 055002 (2014).

(26) Hsiang-Shun Chou and Wen-Shen Su

A Demonstration Experiment of Resonant Standing

Wave

Chin. Phys. Edu. 15, 33 (2014).
